Summary:

Motivated and adaptable **React Native Developer** with hands-on experience **building scalable** and responsive mobile applications. Proven ability to integrate APIs, implement Firebase authentication, and use Firestore for real-time data management. Strong foundation in mobile UI/UX principles, critical problem solving, and cross-platform development. Currently pursuing a Bachelor's in Business & Information Technology. Skilled in delivering efficient, clean code with attention to maintainability and performance.

Skills:

• Frontend Development:

Proficient in building scalable, cross-platform mobile applications using **React Native**. Skilled in crafting responsive and accessible user interfaces with HTML, CSS, **JavaScript**, **Tailwind CSS**, and **Redux** for efficient state management.

• Programming & Tools:

Experienced with **Node.js** for backend logic and **API integration**, as well as **Git** for version control and collaborative development. Proficient in **TypeScript** for strongly typed **JavaScript** development. Hands-on experience with **Firebase (Authentication, Firestore, Cloud Functions)** and implementing **deep linking** within mobile apps. Competent in **Python** for scripting and automation, with experience using **Selenium** for web bot development.

• Soft Skills:

Strong **analytical mindset** with a focus on clean, modular code architecture. Demonstrated ability to solve complex problems, **think critically**, and **adapt quickly** to **evolving** project requirements.

Experience:

• Balawal IT House

React Native Developer

From Aug 2024

(Remote) Daska, Sialkot, Pakistan

- **Developed high-quality**, cross-platform mobile applications using **React Native**, with a strong focus on **responsive design** and user experience across various devices.
- **Built clean, modular, and reusable** UI components, adhering to modern software engineering principles and React Native best practices.
- Integrated **RESTful APIs** and backend services into the frontend architecture, **working collaboratively** with **cross-functional teams** including designers, backend developers, and QA engineers.
- Wrote efficient, maintainable, and scalable code while following **industry-standard** coding conventions and participating in peer code reviews.
- **Diagnosed, debugged**, and resolved UI/UX **issues and logic errors** to maintain a smooth and responsive user interface.
- Implemented **Firebase Authentication** to manage secure user sign-in and access control.
- Utilized **Firestore Database** for real-time data synchronization and reliable storage solutions within the app ecosystem.

Education:

Virtual University :

Sep 2020 - Jul 2024

Bachelor of Science, Bachelor of Business & Information Technology (BBIT)
