

SYED GOHAR ALI NAQVI

React Native Developer

Lahore, Pakistan | +92 304 1038639 | ga741741@gmail.com | [LinkedIn](#) | [Portfolio](#) | [Google Play](#) | [App Store](#)

PROFESSIONAL SUMMARY:

React Native Developer with hands-on experience building and shipping cross-platform mobile applications for Android and iOS. Skilled in React Native, TypeScript, JavaScript, Redux, Firebase Authentication, Firestore, RESTful APIs, deep linking, and real-time event-driven features with WebSocket. Experienced in reusable UI components, backend integration, production debugging, and collaboration with backend, QA, and design teams. Currently pursuing a BS in Business & Information Technology.

TECHNICAL SKILLS:

Mobile Development: React Native, cross-platform app development, responsive mobile UI, reusable components, mobile UI/UX

Languages & Frameworks: JavaScript (ES6+), TypeScript, Redux, HTML5, CSS3, Tailwind CSS, Node.js, Python

Backend & Real-Time: RESTful APIs, WebSocket, Firebase Authentication, Firestore Database, Firebase Cloud Functions, deep linking

Tools & Practices: Git, Selenium, code review, Agile collaboration, debugging, modular component architecture

PROFESSIONAL EXPERIENCE

React Native Developer | goodtogo (Lahore)

Jan 2026 - Present

- Building a real-time event and venue check-in feature using WebSocket, where QR-code scans trigger instant no-reload updates on the paired user screen.
- Implemented one-QR-per-entry validation across connected clients to reduce duplicate or invalid check-ins in live event flows.
- Integrated WebSocket-based real-time communication into an existing React Native + Firebase architecture, extending prior REST-only API communication.
- Collaborating with backend engineers to define client-side state handling for live event updates, connection changes, and real-time UI behavior.

React Native Developer | Balawal IT House (BITH) (Daska, Sialkot)

Aug 2024 - Dec 2025

- Developed cross-platform mobile applications in React Native with responsive layouts and consistent user experience across device sizes.
- Built clean, modular, and reusable UI components following React Native best practices and maintainable component architecture.
- Integrated RESTful APIs and backend services into mobile screens while coordinating with designers, backend developers, and QA engineers.
- Implemented Firebase Authentication for secure sign-in flows and Firestore Database for real-time synchronization and reliable app data storage.
- Used Redux and TypeScript patterns to manage frontend state, improve code maintainability, and reduce UI logic complexity.
- Diagnosed and resolved UI/UX issues, layout bugs, and logic errors to keep mobile screens smooth, responsive, and production-ready.
- Participated in peer code reviews and followed industry-standard coding conventions for clean, scalable code.

LIVE MOBILE APP

Google Play + App Store

Strangerus | Live Android & iOS App

- Built and shipped a production mobile app available on Google Play and the Apple App Store, focused on location-based discovery, check-ins, events, and real-world networking.
- Worked on mobile flows for user interaction, event discovery, connection requests, responsive screens, and app-ready frontend integration.
- Applied React Native, Firebase, API integration, state management, and mobile UI/UX practices to support a live product experience.

EDUCATION

Bachelor of Science, Business & Information Technology (BBIT)

Apr 2023 - Apr 2027(Expected)

Virtual University of Pakistan - Pakistan

ATS KEYWORDS

React Native Developer, Mobile App Developer, Android, iOS, JavaScript, TypeScript, Redux, Firebase, Firestore, REST API Integration, WebSocket, Deep Linking, UI/UX, Agile, Git, Selenium, Node.js, Python
